**a. Company History**

Rana Technologies.com is a Pakistan based company headquartered in Lahore, Punjab founded in August 2006. Our company aims at providing a large number of professional services in the following fields of activity: Mainly Web Hosting, Domain Registration and quality customer support.

**b. What the company does**

[www.RanaTechnologies.com](http://www.RanaTechnologies.com) offer one-stop web based solutions, Which will let you build a successful online presence? View Our Sitemap [Here](#) for Complete List of Services We Offer.

**c. Mission statement**

It may sound unbelievable but the majority of the big companies in the web hosting business usually do not invest much in the development of new technologies. Instead they rely on 3rd party solutions and software. Unlike theirs, our hosting software was created, developed and designed in-house by us. Moreover, our business approach is human-oriented in that our client support is a centre factor in the quality hosting service that we offer.

**Thank you for taking the time to go through this business profile.**
